OUR OFFICE AND STORAGE FACILITIES LOCATED 1 MILE SOUTH OF ROGERS ON HIGHWAYS 71 AND 72

WHERE WE ARE . . . We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-

three miles almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers Ark.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

13 REASONS WHY YOU SHOULD BUY FROM US!

- 1 Because we grow and sell you trees, plants and vines that are as good as the best that can be produced at prices far below what others will ask for the cheap inferior kind. Our nursery stock is grown by the best methods known to nurseries and no better can be produced regardless of prices. We offer \$100.00 reward for improved method on how to grow better nursery stock.
- 2 Because we prepay the postage or express charges on all orders amounting to \$10.00 or more, except Balled or Burlapped Evergreens.
- 3 Because we sell direct to the fruit growers saving you the agent's or middleman's commission.
- 4 Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.
- 5 Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.
- 6 Because all our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.
- 7 Because we use every caution to keep all our varieties true to name and should a mistake occur and any variety prove untrue to name we will replace it free of charge or refund the price paid for it.
- 8 Because we grow and offer for sale only varieties that are known to be good fruits and money makers.
- 9 Because Benton County, Arkansas, has many, many acres of varieties of fruits and we have under our close observation a greater variety of fruits and berries than our competitors.
- 10 Because Ozark Mountains, Arkansas, Grown Nursery Stock is now considered by Horticulturists to be as fine as the best that can be produced.
- 11 Because trees and plants must be well rooted if success is to be made with them. Ours are of the best to be had.
- 12 Because our old customers send us repeated orders and their neighbors send us their orders; a proof that they are well pleased.
- 13 Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

PRICES QUOTED IN THIS CIRCULAR CANCEL ALL PREVIOUS QUOTATIONS

WE CANNOT ACCEPT ORDERS FOR LESS THAN \$1.00

Because of the heavy expense of packing and high rates on first pound by parcel post and express we cannot fill orders for less than \$1.00, without loss to us and will ask you to make your orders amount to \$1.00 and up.

We accept orders subject to stock being unsold when your order comes up for shipment.

WE WANT YOU TO BE PLEASED with your orders you receive from us; we know that is the only way we can expect you to be a satisfied customer. Every plant that you order from this circular is **guaranteed to live**. We will replace free of charge any or all plants you buy that fail to live. We are not asking you to take any risk whatsoever, just give us your order and let us prove to you that we mean what we say. **All you have to do** is be sure that your order is received on or before **April 1st, 1946**, and that you notify us of any plants that fail to live on or before June 1 after purchase. All we want is an opportunity to show you that we are proud to have you as a customer and leave the rest to us. We guarantee you will be a satisfied patron.

GREEN POD BUSH BEANS

1,200 to One Beans—A Gigantic Wonder. Over 200 pods have been grown on a single plant—all well filled, producing over 1,200 beans from one bean. Strong, erect plants, bearing pods well up from the ground. Order now as supply is limited.

Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.25

TENDERGREEN—STRINGLESS

53 Days. Plants make a strong, vigorous growth; are well branched and bear a great quantity of beautiful dark green, round, extremely meaty, tender pods, 6 to 7 in. long. Absolutely stringless at all stages of growth; always free from fiber, and of the most delicious flavor. Pods mature early and are borne profusely for a long time. The attractive appearance of the high quality pods makes them ideal for market or canning.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

FULL MEASURE—STRINGLESS

54 Days. Medium early, well-branched round plants bearing a large crop of perfectly stringless, very fleshy, deep green round pods measuring 5 in. in length. Quality is superb and the flavor rich and satisfying. Popular on account of its high yields and long picking season.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

GIANT STRINGLESS GREEN-POD

51 Days. The straight, rather slender pods grow 6 in. long; meaty, round, brittle, and absolutely stringless. Somewhat similar to Burpee's Stringless Green-Pod. Seeds are a light brown color. The plants are of strong growth, compact, and bear a heavy crop of pods for a long time.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

BOUNTIFUL STRINGLESS GREEN-POD

48 Days. Attractive green pods of the choicest quality; 6 in. long, flat, tender, strictly stringless, and of rich flavor. Matures early. Has proved to be unexcelled on heavy as well as light soils; reliable everywhere. Plants are vigorous, hardy and very prolific, bearing over a long season. Bountiful is the best of the flat green-pod Bush Beans.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

Improved Golden Wax Beans

Undoubtedly one of the best wax beans for the home garden. Rust-proof, an improvement of the old style Golden Wax. Pod is semi-round, yellow, of good quality, and it has no strings. Ready for picking 47 days from planting.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

THE "FROST-PROOF" BEAN

You Can Plant It Early With the Radishes. 75 Days. ENGLISH BROAD BEAN. Sometimes called the "frostproof bean." Different and unusual. Plant with your early garden at the same time you plant radishes and onions. Very hardy. Its growing habit between a bush and vine. Shell beans are large and have a distinctive flavor.

Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.20

EDIBLE Soybeans For Vitamins

Bansei—(90 Days). An early edible type adapted for production of ripe beans in regions of short seasons but suitable for green shelling. Very productive, not as susceptible to shattering. Pods yellow with black line. Plant erect and medium height. Seed medium sized and yellow.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

POLE BEANS

KENTUCKY WONDER OR OLD HOMESTEAD

(65 Days). We prefer this to all other green-podded pole beans. It is early, climbs well, and bears a heavy crop of large, green, curved pods, 7 to 9 in. long. They are thick and meaty, tender, brittle, and of good quality, showing slight strings as the pods reach full size. Though thick, they appear slender on account of their great length.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

Missouri Wonder

(65 Days). Round, medium green pods, 6-in. long. Extremely early. Excellent corn hill beans for snaps.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

White Creaseback

(68 Days). The green pods are 6 in. long, round, deeply creased or saddle-backed, entirely stringless and brittle. The white seeds are fine for baking.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

SOUP BEANS

The Old Standby for Winter Use GREAT NORTHERN

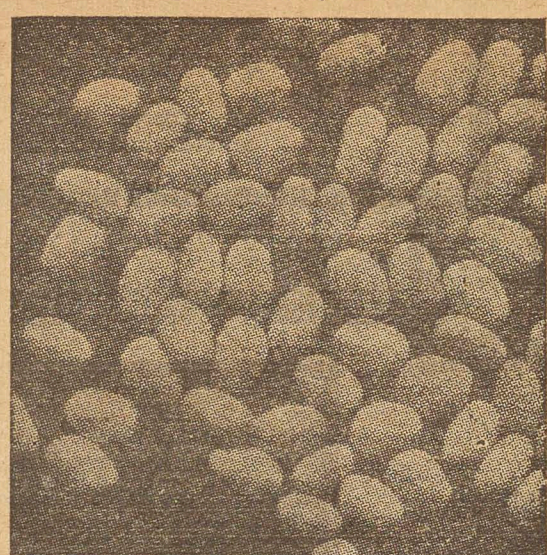

The Large Flat Soup Bean (90 Days). (Montana White). A little larger than the Navy Bean but eats every bit as well and is lots easier to pick over. A good yielder and early.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c
2 1/2 lbs. 90c

RED KIDNEY

(70 Days). As easy to grow as the others. Good yielder of large, dark red, dry beans. Just the thing for baking or for soup.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

Burpee's Improved Bush — The largest of 5 to 6 inches long by 1 1/4 inches wide and the in size to those of the large Pole Limas. Pods all Bush Limas, bearing pods almost equal full size beans are of luscious flavor.

Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

Henderson's Bush Baby Lima

67 Days. Most dependable and best yielder of the Limas. Small white bean. Great for shell bean, for canning and for winter drying. Stands dry weather and a great yielder. I have seen vines with about as many pods as leaves.

Pkt. 15c; 7 oz. 25c for 25c
7 oz. 35c; 14 oz. 45c; 2 1/2 lbs. \$1

HOPI INDIAN BEAN

This Bean has been grown by the Hopi Indians of Northern Arizona from prehistoric times under strictly dry farm conditions and crude farm practices. In trying these out, we find them to be a very fine eating bean. A small crop grown in 1933 and the growers claim that they produced more heavily than any bean we have. They are semi-vining, long rooted, drought-resistant beans, and should be placed in rows 30 to 40 inches apart. They require the full summer season and should be harvested before frost. The great productivity of this bean under general climate conditions should make it very popular with gardeners and we suggest that you try out a supply this year.

Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.20

LARGE WHITE POLE LIMA

(88 Days). Also known as "King of the Garden." Pods are 6 inches long, broad, flat, and contain 4 or 5 large greenish white Beans of superior quality. Productive over a long season.

Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

Be sure to add

10% to cover cost of postage and handling.

SPINACH

BLOOMSDALE SAVOY—Extra dark green strain. A new, beautiful, better and darker strain. Its glossy green color gives the plants a fresh appearance for a longer time and it is quite early. The leaves are large, fleshy and deeply crumpled. The plants are of upright growth.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 55c

CABBAGE

LIGHTNING EXPRESS

The Earliest Cabbage in Cultivation. Our Lightning Express is ready for use in 65 to 70 days from sowing—ten days earlier than Jersey Wakefield. Good fair trials of varieties offered by other such houses as "the earliest grown" have proved that they are from four to ten days later than our Lightning Express.

LIGHTNING EXPRESS is positively the earliest cabbage in cultivation. The heads are pointed, of good size, a little smaller than Jersey Wakefield, always sure to head, solid and firm, and always in demand on the market, bringing high prices on account of their extreme earliness. Very hardy, permitting earliest planting. There are but few other leaves, and plants may therefore be set closely together. As many as 14,000 heads can be grown on one acre of ground, and will bring a larger profit per acre than later and heavier varieties.

Pkt. 15c; 2 Pkts. 25c

CHARLESTON WAKEFIELD

(71 Days). About a week later than Early Jersey Wakefield, but the conical heads are fully one-half larger, less pointed, and usually weigh 4 to 5 pounds. The heads are broad, heart-shaped, 8 inches long, 7 inches broad at base, firm, very solid, and a heavy yielder. Largely used in the South for spring shipping to northern markets and also excellent for the home garden and truckers.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 40c

EARLY JERSEY WAKEFIELD

(62 Days). Our stock is characterized by its distinctive, smooth, blue-green leaves. It has all the elements that count for cold-resistance and unusually early maturity. The small, compact, hard, conical heads are 7 inches long, 5 inches wide at the base and weigh 2 pounds. Plants small, with short stems, permitting close setting in the row. Valuable for the home and market garden.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

COPENHAGEN MARKET

One of the finest early round-headed cabbages in cultivation. It is desirable on account of the remarkable characteristics of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the cleaning of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid with small core. The quality is extra fine and sweet. It is a short-stemmed variety, the heads nearly resting on the ground.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

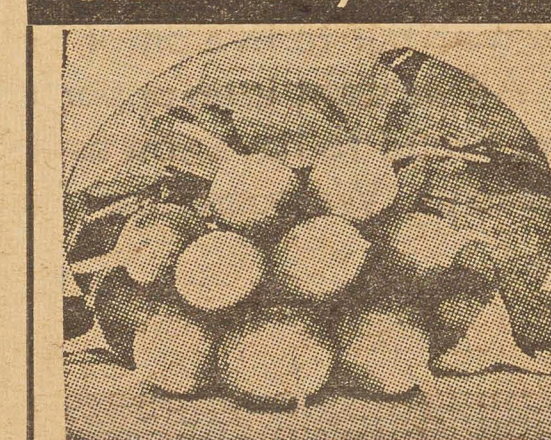

FOOD WON THE WAR — FOOD WILL MAINTAIN THE PEACE

The peoples of war-torn Europe are to be fed as of course our fighters, who will patrol the conquered Nations.

We can dictate the peace with food. Not only staple cereals and pasture lands for livestock production are vital but equally so fresh and canned vegetables are absolute necessities for our Armies of occupation and Civilian population. Our National economy therefore demands that each and every one of us do our part in vegetable production. For reasons of health, morale, economy and sustenance, we should respond to the nation's call for more gardens.

The Benton County Nursery Company is a member in the Victory Garden Corps and is anxious to co-operate in the national effort to maintain PEACE. Pride of the Ozark seeds are dependable. Try them in your Peacetime garden and do your part in maintaining PEACE.

Grow Plenty of EARLY RADISHES

Crimson Giant

(28 Days). If you desire a Radish of more than two bites, you will find this to your liking. The crimson roots are large, globular, 1 to 1 1/4 inches in diameter. Flesh is white, crisp, and of special quality. Its fine flavor to the last. Valuable for home-garden use. The white flesh holds its firmness well. The tops are medium small.

All Varieties, Pkt. 10c; 3 pkts. 25c; 1/4 lb. 50c

BEETS

CROSBY'S EGYPTIAN

(48 Days). An extra-early variety for home and market garden use. Unexcelled for bunching. Roots are smooth, round, with slightly flattened tops; small tap-root. The flesh is very dark blood-red. Tops are medium and the roots deep purplish red. Crisp and tender.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 70c

DETROIT DARK RED

(59 Days). An early maturing beet of remarkable uniformity. Splendid for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 2 1/2 to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. \$1.00

CARROTS

CHANTENAY—LONG TYPE

(70 Days). A new strain of Chantenay bred to meet the recent popular market demand for longer Carrots. Roots deep orange, smooth, tapered, stump-rooted. The strong, medium tops make it an ideal variety.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

DANVERS HALF LONG

(75 Days). A prime favorite because of its brilliant market appearance. The smooth, handsome roots are 6 1/2 to 7 1/2 inches long, tapering uniformly to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, thus always selling at top market prices. Our strain is outstanding.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

NEW CORELESS CARROT

A new rapid growing early variety of superior flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or full grown.

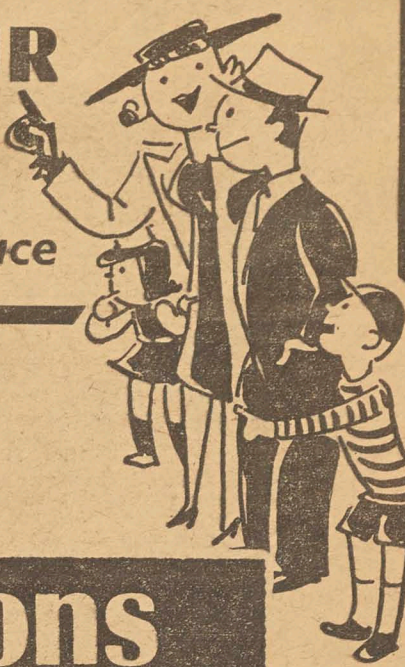

Pkt. 15c; 2 pkts. 25c; 1 oz. 50c

LOOSE LEAVED VARIETIES

BLACK SEEDED SIMPSON—A favorite among the loose leaved kinds, very crisp and tender.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

EARLY CURLED SIMPSON—The best of early varieties of the loose leaved kinds; leaves light green, crisp and fine flavor.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

onions

EBENEZER, The Extra Early, Long Keeping, Mild Onion

One of the mildest flavored onions grown. The flesh is white, firm and of a very delicate flavor. The onions are quite similar to Yellow Globe Danvers in shape but much larger in size, yellow skinned and have very small tops and mature early. Many people who know this onion will have no other kind for their own table. In the localities where it has been grown, the onions of this variety command much higher prices than other kinds. Those who want a nice mild onion, either for large onions or bottom sets, would do well to try the Ebenezer. Sets are grown the same as large onions, except that the seed is sown thickly—one pound of seed to each 100 feet of drill. These sets, if planted early in the spring, will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce seed stalks as other kinds do. The Ebenezer is such a good keeper that even those ripening in July will keep sound and hard through the fall and all winter. Don't fail to plant some Ebenezer onion seed this season, sowing some for large onions and some for sets.

Pkt. 15c; 2 Pkts. 25c

(110 days) White Sweet Spanish

Large, mild and sweet. Pure White. A much better keeper than the Bermudas.

Pkt. 15c; 2 Pkts. 25c

GROW YOUR OWN DILL (70 Days). Annual. The young stems are nice for flavoring soups and sauces and are used extensively in a minced state with lettuce. The dry or green branches and seeds are much prized for flavoring dill pickles. 2 1/2 ft. tall.

Pkt. 10c; 3 Pkts. 25c

Add 10% on all seeds and Allied lines to cover postage and handling

Mustard

SOUTHERN CURLED—Leaves large light green, finely curled, and have a mild agreeable flavor. It also makes a fine greens for poultry.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 60c

Try This New American Drought-Proof Pea

Laughs at Drought. Smiles at Rain. For mid-summer planting this is the variety to plant. If it rains and the soil is kept moist, this variety will produce as large a crop as any variety we know of. If it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the pea that will do its best in the North, South, East or West. Don't fail to try it.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

AMERICAN PEAS THE DROUGHT RESISTER

(60 Days). Always comes into bearing ahead of the other wrinkled ones. Very dwarf, medium size pods of good quality, unusually productive.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

ALASKA or Earliest of All

(60 Days). Standard, popular, Extra-early smooth-seeded pea for market and canning. Vines 2 1/2 ft. tall; light green. Well-filled, medium-sized pods completely packed with small round green peas, which mature practically all at one time. The pods are plump and round, light green, blunt. The mainstay of the grower who wants a variety that can be cropped in one picking.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c; 2 1/2 lbs. 90c

THOMAS LAXTON

(57 Days). This has no superior as an early Pea of medium height. The veins are strong, with large dark green foliage, and grow 2 1/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 4 1/2 inches long. These are well filled with large, tender Peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home-garden and shipping.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

LITTLE MARVEL Tender, Heavy Yielder

(62 Days). It will be a long time till we find a better one than this. For quality, yield, earliness, or any other point, it's hard to beat. A vigorous grower and a heavy yielder. Three quarts of pods will often shell out a quart of peas. Tender and sweet, and of finest quality.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

SWEET CORN

Cornfume

The Easy-to-apply, Economical Control of Corn Ear Worm

Based on a formula successfully used in tests made by leading Agricultural Specialists, The Cornfume Applicator delivers just the right dose in one application. To be applied on the Corn just before the silks turn brown. One application is sufficient for satisfactory control.

CORNFUME is tasteless and odorless. It does not impart any foreign flavor or odor to the corn.

PROTECT YOUR CORN CROP AGAINST THE RAVAGES OF THIS MOST DESTRUCTIVE INSECT.

12 Indoor Narcissus 79c

These are the lovely narcissus that bloom so easily indoors and are so fragrant they perfume the entire room. You should have some coming off and on all winter and some potted up for gifts.

How To Grow

Force in bowls or pots filled with pebbles (to hold down the bulb) and water or in dirt. Keep out of light in cellar until roots develop (about 3 weeks) and then put in sunny window to bloom. Plant 3 bulbs to pot.

Blooming Dates

To help you plan your planting, here are the dates your narcissus will bloom:

Plant	Bloom	Plant	Bloom
Oct. 1	Dec. 5	Nov. 1	Dec. 25
Oct. 15	Dec. 15	Nov. 15	Jan. 5

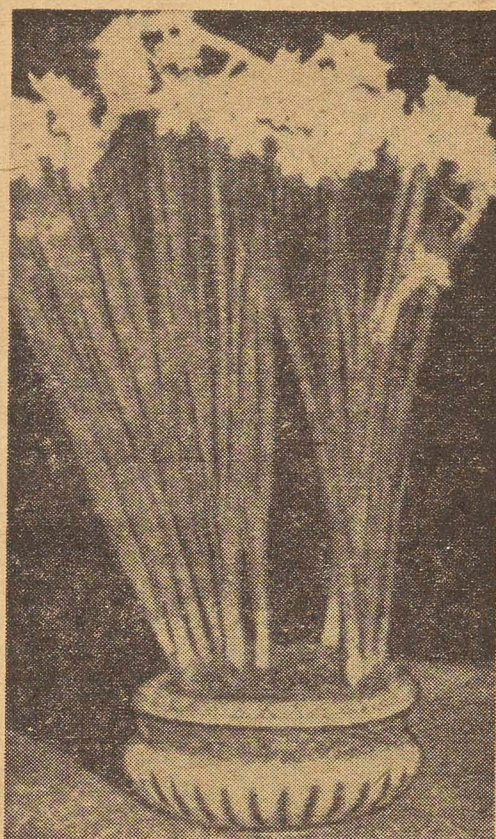

Now! Choice of 2 Colors

PAPER WHITE NARCISSUS—The old favorite—very easy to grow, very pure and white.

3 for 34c; 6 for 54c; 12 for 79c
NEW YELLOW NARCISSUS (Soleil D'or)—Just like the paper whites, but in a beautiful yellow color with an orange cup. A grand, new and better one that will surprise your friends.

3 for 39c; 6 for 69c; 12 for \$1.29

CUSTOMER FOR TEN YEARS

January 31, 1939.

Dear Sir:

I have been a customer of the Benton County Nursery Company for ten years and find that there are no others that can compare with them for good stock and price. During that time I have ordered from other nurseries but have been sorry.

In 1934, when my Florence Crabapple tree was six years old, it made six bushels of apples. They were gathered the 10th of August and I sold them all to one man for \$1.50 per bushel. This same man helped me gather them and we noticed at that time some blossoms on the tree. The fifteenth day of October I gathered some over a bushel of fall apples off this same tree. Then it had the third crop of blossoms and I took them to the City Editor at Gainesville, Texas. Now, don't think this is not true for it is, and I will make an affidavit to this fact and get the best man in Cooke County to sign it.

You may expect another order from me in the fall.

Yours very truly,

MR. J. Y. JOHNSON,
Valley View, Texas.

Crocus PLANT TULIP BULBS THIS FALL

Yellow, Blue
or White
10c each
\$1.00 dozen

FOR GIANT BLOOMS NEXT SPRING!

Tulip Bulbs are best quality, grown by one of the largest and most reliable tulip growers. All bulbs are hardy, produce giant blooms every spring. They are equal in every way to Holland-grown bulbs. Very hardy.

Our selection includes choice Giant-Flowering Darwins, Cottage and May-Flowering varieties. Tulip bulbs can be planted only in the Fall, and they will produce gorgeous blooms for you next Spring. Easy to plant.

Sold in color groups only. High quality, healthy bulbs in each color. Ready for shipment in late September. State quantity wanted. Planting instructions furnished in each shipment. Tulips are easy to grow.

MADISON COUNTY MAMMOTH PEACH—Largest peach we have yet grown; ripe 20 days after Elberta. Yellow, overlaid with carmine. Fine quality.

IMPROVED
ELBERTAS

NEWER VARIETIES

OF THE MOST PROMISING PEACHES for HOME and MARKET

	Each Rate	10 Rate	100 Rate
2 to 3 feet.....	60c	50c	45c
3 to 4 feet.....	80c	70c	90c
4 to 5 feet.....	\$1.00	95c	90c
5 to 6 feet.....	\$1.10	\$1.05	\$1.00

New Improved Elberta—The fruit is almost round, with deep red blush on the side; it is easily 4 to 5 inches in diameter with excellent flavor. A few years ago a local fruit man gave \$5.00 for a bushel (when he could and was buying ordinary Elbertas for \$1.50 to \$2.00 per bushel), which was presented to the president of the Frisco Railroad Co. This fruit dealer was informed by the railroad officials that they could place a carload of that quality of Elbertas and pay the grower \$5.00 per bushel if they could be had.

WILDER'S EARLY—Very early and gets sweet on the tree.
FLEMISH BEAUTY—Large and juicy, medium late.
BARTLETT—Early, large; good quality.

ARKANSAS BLACK
ANOTHER BRAND NEW PEACH—The Arkansas Black is the earliest peach known in this section. It ripens before the Mayflower; it is much larger than Mayflower and the most beautiful color we have yet seen for a peach. They are a very dark red getting almost black; clingstone and of good quality. They have a good color for several days before they are ripe, and from the time they are ripe the fine appearance they have and good quality make them sell like hot cakes.

AROMA—One of the best commercial berries.
KLONDIKE (Improved)—One of the best shipping berries.
BLAKEMORE—The new strawberry that promises to be the best market berry yet introduced; medium early, very productive; fine quality and good shipper.

GEM—The Big Jumbo Everbearing
 Largest of all everbearers. Fine appearance in color and quality.
 25 plants \$1.50; 50 plants \$2.75; 100 plants \$4.00
 500 plants \$15.00; 1000 plants \$25.00

MADISON COUNTY MAMMOTH

The largest peach we have ever known. The giant of the peach family. This peach originated in Madison County, Ark., and always took first prize when put on exhibition at fairs and fruit shows. The peach is yellow, overlaid with carmine. The texture is fine-grained and firm; the flavor is very pleasant, rich and juicy, which makes it one of the very best in quality. Ripens about 20 days after Elberta. Only a few trees for the market this season. Cling. Same price as the New Improved Varieties.

GARBER—Very large, oval. Sweet and very pleasant.
DOUGLAS or BLIGHTPROOF—Large; good quality; late; free from blight.
KEIFER—Large, golden yellow, late.

NON-WARRANTY—In event that any nursery stock or seeds sold by us should prove untrue to name under which it is sold, we hereby agree on proper proof of such untruthfulness to name, to replace that portion of the order proven untrue to name or refund the purchase price thereof. Except for such liability, and in respect to all nursery stock or seeds sold by us, we give no warranty, express or implied, as to description, growth, productiveness or any other matter.

FIGS **MAGNOLIA**—Large pale green. From July to September.
TEXAS EVERBEARING FIG—Ripens its fruit from July until frost. Each tree will bear first year. Bears on its new growth. Light straw to brown in color; medium size and very sweet. Extra good for preserves and eating fresh.
 2 to 3 feet, 75c each; 3 to 4 feet \$1 each; \$7.50 doz.; \$10 doz.

APRICOTS **MOORPARK**—Large; yellow overlaid with red.

STUBBS—Excellent quality and enormous size.

Plant the New
BOYSENBERRY
for Handsome Profits!

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing blackberries, raspberries and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and soft seeds. The plant is very vigorous and hardy, coming through in good condition, without injury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and over one inch in diameter.
 Ea. 12c; 10 \$1.20; 100 \$8; 1,000 \$60

YOUNGBERRY

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle; it is very attractive, ships well, keeps well and can be used in many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry culture.

Youngberries are universally liked and easily grown. They are among the largest berries, of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberry bushes than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

GOLDEN WINESAP—Large, yellow with red blush, fine quality, good keeper.

RED DELICIOUS—(Blood Red) (Triple Red) of best quality and good keeper.

This FALL Is the Best Time to Plant That Orchard

—WHY DO EXPERIMENT STATIONS, AGRICULTURAL COLLEGES AND FRUIT GROWERS RECOMMEND FALL BUYING? Because you can buy this Fall and have the stock shipped to you and "heel it in" so that you may plant at the most favorable time during Fall, Winter, or next Spring.

Fall planting is becoming more popular each season as experience shows its advantage. As soon as a tree or shrub becomes dormant it can be moved and the change of location will affect it but little. When set out in the Fall the bruised roots begin at once to heal and callus is formed; recover quickly from moving; soon become firmly established and with the first touch of Spring are ready to go into business for themselves in a vigorous way.

Again, the ground is usually in better condition for planting in the Fall than in Spring, for much Spring planting is done when the ground is too wet for best results. Perhaps your Spring will be two or three weeks earlier. In this case your trees should be planted earlier than the dates you have ordered them shipped. If they have been planted in the Fall, these Spring delays are done away with.

Below We Quote From One of the Best Authorities in the Country on This Subject

C. A. McCue, Horticulturist, New Castle County, Delaware.

It is good practice to do as much Fall planting as possible. Our experience is that a Fall planted tree does at least 50 per cent better the first year than one set out in the Spring.

RHUBARB (PIE PLANT)

Culture—Good plants are easily grown in any good soil. Plant four feet apart each way, in deep, warm and very rich soil. The more manure the better stalk. For winter forcing, take up two-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark.
GIANT VICTORIA—This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright, crimson color, very tender, crisp and of mild, delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 10 to 24 inches long; broad, thick and solid; stalks will weigh on an average one-half pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money maker and in great demand. Try a dozen or two, our word for it you will never have cause to regret your purchase, and you will never be without some of this variety.

10c each, \$1.00 per doz.

STALEYMONIE "Staleymone" Does This

"Staleymone" hastens the germination of seeds. Seeds and cuttings dusted with "Staleymone" powder put forth root systems that untreated seeds and cuttings, and, as a result, grow faster and produce sturdy plants capable of withstanding greater climatic hardships than those that are untreated. This better root system persists throughout the life of the plant and results in not only a larger and stronger plant, but a greater yield of flowers, seeds and fruits. The application of "Staleymone" to plants and shrubs at transplanting time hastens the root development in their new location and overcomes much of the loss from wilting and shock. Watering plants once each week where possible with "Staleymone" solution will increase the number of fibrous roots and add vigor and vitality. Dusting crops or plants during the blossom stage with "Staleymone" will often inhibit the drop or abscission of a great many blossoms that would ordinarily be lost and also increase the number that are fertilized so that a greater yield results. Dusting some fruits with "Staleymone" inhibits the abscission layer from separating and the fruit from dropping before maturity.

NOTICE

Due to many of our employees being called to the armed forces the past several years we were forced to replace them with new hands. This has caused confusion in handling our business but we feel that our customers understand the circumstances we are placed in.

Trusting that conditions will be more settled and on an even keel we plan to strive and serve our customers better than ever before. We are in business to please you and if we fail, we invite your suggestions at any time so we can give you the service you may expect and that service with a capital S.

We aim to sell seeds true to name or notify of substitution. Accurate measurement and weights of seed in packets. Give the customer the benefit of the doubt. We want to prove to you that we are fair and we feel the customer will come back with the same spirit.

We believe in fair treatment to our customers, extra care in packing promptness, honest measure and certainty in filling orders.

We don't believe in tricky or big words to our customers. We believe in answering the customer's questions as intelligently fair and carefully as we can, whether we receive an order or not. If the customer gets out of line we aim to be patient and show him courtesy. Arguments never got any one anywhere when both parties are mad.

We ask this of our Customers: As our seed Dept. is separate from the Nursery Dept. it would help the employees if you would list garden seeds together and then Nursery items. We'll appreciate your help especially during these times of shortage of labor and with new but willing help. THANKS.

"PRIDE OF THE OZARK'S SEEDS"

THE PLANTER'S TIME TABLE

Variety	When to Plant	Quantity For 100 Feet	Quantity For an Acre	Distance Between Rows	Distance Apart in the Row	Depth to Plant	Pounds to the Bushel

BEAUTIFUL CLIMBING ROSES

RED RADIANCE—A vigorous climber and identical with the bush Radiance.

TALISMAN—Same shade and quality as the bush variety.

PAUL'S SCARLET—Scarlet flowers of excellent shape and moderate size, borne in small trusses.

PINK VARIETIES

PINK RADIANCE—Large pointed buds that are rosy-carmine on the outside of petals and light silvery pink on inside. Very beautiful.

DAME EDITH HELEN—A true pink with pointed blossoms.

EDITOR McFARLAND—A deep sparkling pink. Upright bushes which hold the flowers stiffly erect and make them particularly suitable for cutting.

EDITH NELLIE PERKINS—The open blooms on the outside are bright orange cerise and the inside overspread with pale salmon-pink.

Everblooming ROSES

You Pick Bouquets Galore
When You Plant Them.

Field Grown 2-year
\$1.00 ea. \$10.00 doz.

BEAUTY UPRICHARD—Large blooms of delicate salmon-pink, one of the best bloomers.

YELLOW VARIETIES
GOLDEN DAWN—Richly fragrant, pale and lemon-yellow flowers of great size and lasting quality.

WHITE VARIETIES
K. A. VIKTORIA—Well formed creamy buds, which develop slowly to snowy white blooms of perfect form.

CALADONIA—A pure white rose that is very fragrant.

TWO-TONE VARIETIES
TALISMAN—Brilliant red and golden buds that open to beautifully shaped blooms of scarlet-orange and golden yellow. Will thrive almost anywhere.

PRESIDENT H. HOOVER—Large, cerise-pink, flame scarlet, and yellow bloom. Broad petals and fragrant.

ETOLE DE HOLLANDE—Rich, velvety crimson, cerise red center.

E. G. HILL—Dark red. Profuse bloomer.

FRANCIS SCOTT KEY—Glowing scarlet with darker shadings.

RED VARIETIES

RED RADIANCE—Magnificent clear glowing red, one of the most popular varieties.
